

## SIGNAL BOOSTERS

SMOOTH TALKER: Information from: [http://www.smoothtalker.com/products/booster\\_for\\_cdma.php](http://www.smoothtalker.com/products/booster_for_cdma.php)

### ***3-Watt Cell Phone Amplifiers Boosters***

#### **BST800 Series Made for CDMA phones and networks:**

ACS, Aliant Telcomm, Alltel, Bell Mobility, Blue Grass Cellular, Carolina West, Cellcom, CellularOne/western Wireless, Cellular South, First Cellular, Five Star, Inland Cellular, MTS, Pioneer, Rural Cell, Sasktel, Telus, Three Rivers, Thumb Cellular, US Cellular, Verizon

The most powerful cellular 3 watt bi-directional cell phone signal booster amplifiers available for mobile or stationary environments. The BST800 cell phone kit will amplify receive and transmit signals. These boosters increase the operational distance between the cellular telephone and the cellular base station by up to 60 miles.

**No In-Car Kit Required  
No Professional Installation Required  
Can Be Used In The Car, Home, Office Or Cottage**

## Compatible With Dual Band and Tri-Mode Cellular Telephones, PDA's and Wireless Aircards

- ➞ The BST800-series Boosters are specifically designed to be used with CDMA digital tri-mode phones. The BST800 is designed and rated to amplify CDMA IS95, CDMA 2000/EVDO, WCDMA and AMPS analog signals in both directions. The BST 800 series boosters have the highest measured output power, the most sensitive receivers and the best CDMA signal quality specifications of any booster/amplifier on the market.
- ➞ Professional installation is not required when used in hand-held mode as shown above. A variety of [external antennas](#) are available.  
**Note:** best performance and range will be achieved when used with a magnetic or thru-hole antenna. Genuine Smooth Talker cellular antennas will produce the best results and increase cellular range the farthest.
- ➞ An [antenna adapter cable](#) to connect to various phones must be ordered separately and optional AC/DC power supply for use in home or office is available. The Booster can be used with cellular wireless phones in hand-held mode as seen in the picture above, it can be used with PDA's and wireless aircards or it can be ordered with an installation-ready power cord and added to a cellular hands-free in car kit.
- ➞ Size: 8.75 X 3.125 X .875 inches  
 Weight: 19 ounces  
**Note:** The RF connectors on the booster are proprietary (MCT) and an [adapter](#) is required to use this booster with an after-market antenna. A genuine SmoothTalker antenna is recommended with this device for best performance and range.
